

WATER THAT'S GOOD

for your family, your home, and your pets

ECO-X (7-Stage)

Whole Home Municipal Water Treatment System

Specifications

FW-ECOX	948	1252
Stages	7	7
Bathrooms	up to 3	up to 5
Capacity	≈ 650,000	≈1,250,000
Service flow	12 gpm	18 gpm
Tank size	9"d x 52"h	12"d x 56"h
Warranty	10 Years	10 Years

Freedom Water Non-Backwashing

7-Stage Salt-Free Filtration & Conditioning System

The ECO-X system is an affordable All-In-One whole-home water treatment solution that requires No Salt, No Maintenance, No Electricity, and NO Drain!

The advanced water refinement technologies used in the ECO-X offer comprehensive removal of 100's of contaminants such as Volatile Organic Chemicals, Chlorine, Chloramines, THMs, Heavy Metals, Herbicides, Pesticides, Pharmaceutical Residuals, and more. The ECO-X system is your most economical water treatment solution as it DOES NOT require periodic filter changes, electricity, or generate any wastewater. This makes for easy installation, even in condos or areas that do not allow drainage.

The patented Scale Sequestering Ionizer prevents hard water scale build-up without the use of salt or potassium, making the system completely maintenance-free. The ionization process prevents hard water scale formation inside your pipes, on plumbing fixtures, and even extends the life of your water heater and other major appliances.

Finally, an affordable, eco-friendly, premium-grade water treatment system that delivers pure, healthy pH balanced alkaline drinking water throughout your entire home.

SAVINGS PER YEAR COMPARED TO OTHER SYSTEMS	
\$100	Salt / Potassium
\$150	Wasted regeneration water from water softeners
\$200	Refrigerator or reverse osmosis filters
\$150	Water heater replacements due to rust from water softener brine water
\$400 +	Bottled water
\$1,000	Approximate Annual Savings

Features and Benefits

- NO Salt, NO Maintenance and NO Filters to Change
- Zero Waste Water
- No electricity required! Provides safe clean water even in the event of a power outage.
- 30-day satisfaction or money back guarantee
- Industry best 10-Year Warranty
- Enjoy softer hair and skin
- NSF Component Certified
- Fresh, great tasting pH balanced alkaline drinking water from every faucet in your home.
- Eco-Friendly
- Recommended for all water heaters, even tankless
- Protects your family from harmful contaminants that are absorbed into the skin while showering and bathing.
- Made in the U.S.A.

*pH may vary depending on your location
 **For use on Municipal Water Treatment Applications Only

Stages of Filtration:

Stage 1: Bacteriostatic Redox -

A natural bacteriostat that removes Chlorine, Heavy Metals (Lead, Mercury, Copper, Chromium, and other dissolved metals). It also controls scale and algae by preventing the formation of waterborne bacteria and micro-organisms.

Stage 2: Kingsorb -

This media utilizes a microporous structure to provide a much longer service life than lower grades of media often found in other systems. Kingsorb effectively removes chlorine, chloramines, THMs, PFAs/PFOAs (forever chemicals), volatile organic compounds, pharmaceuticals, biological compounds, and more.

Stage 3: Zeolite Mineral Stone -

Reduces sediment and turbidity down to 30 microns to increase filtration efficiency, it also removes unpleasant tastes and odors.

Stage 4: Anthracite Mineral Stone -

An unactivated carbon-based mineral that is designed to clarify the water by removing suspended particles down to 20 microns and helps to increase service flow.

Stage 5: Garnet Mineral Sand -

This dense mineral is a polishing stage that reduces sediment down 10 microns, ensuring fresh, crystal-clear drinking water.

Stage 6: Quartz Mineral Stone -

A coarse mineral that maximizes service flow, helping to maximize service flow and capacity.

Stage 7: Scale Sequestering Ionizer -

The ionizer converts calcium bicarbonate to "Aragonite", which is a healthy water soluble version of calcium that will not adhere to plumbing and fixtures, preventing the damaging effects of hard water scale formation within your plumbing system, fixtures and appliances. Say goodbye to adding salt or performing any kind of maintenance.
