SALT-FREE MUNICIPAL WATER SYSTEM

Platinum Series

Salt-Free
6-Stage Municipal Water
Filtration & Conditioning System

The Pinnacle Solution in Salt-Free Water Treatment

- Single Tank System
- Hi-grade stainless steel jacketed tank
- No salt, no potassium, and no filters to change
- Industry-leading 20-year All-Inclusive warranty

PLATINUM SERIES

Municipal water, conditioned.

The Platinum Series is a complete whole-home solution designed to support a healthier lifestyle and household. Every unit is handcrafted in the United States, so we can maintain the highest standards in materials and manufacturing.

Its 6-stage filtration process is designed to reduce thousands of chemicals and contaminants, including chlorine, chloramines, THMs, heavy metals, volatile organic compounds (VOCs), PFAS ("forever chemicals"), sulfur, PCBs, herbicides, pesticides, radionuclides, and pharmaceutical residues. Once the water is thoroughly filtered, it flows through our proprietary anti-scale ionization chamber, which helps protect your plumbing and appliances from the damaging effects of hard water scale.

The Platinum Series helps reduce your family's exposure to potentially harmful chemicals that may be found in municipally treated water, whether you're drinking it, bathing in it, or breathing it in.

Enjoy clean, conditioned water at every faucet in your home, with no hassle. Every system is backed by our industry-leading, all-inclusive 20-Year Warranty, so you can rest assured you've chosen the ultimate in whole-home water treatment.

Specifications

Specification	FW-PLA-MUN-1354	FW-PLA-MUN-1054
Filtration	6-stage filtration	6-stage filtration
Bathrooms	Treats up to 6 bathrooms	Treats up to 4 bathrooms
Capacity	≈2,750,000 gallon capacity	≈1,750,000 gallon capacity
Service flow	Service flow up to 28 GPM	Service flow up to 23 GPM
Backwash	Automatic backwash	Automatic backwash
Tank size	Tank size: 13″ x 54″	Tank size: 10″ x 54″

HOW THE SYSTEM WORKS

Six stages of filtration.

01

KDF *55*

Designed specifically for removing or reducing chlorine and water-soluble heavy metals. It also controls scale, bacteria and algae, even in hot water. KDF 55 has received NSF International Certification and is certified by NSF to NSF/ANSI Standard 42 drinking water applications.

02

Katalox

Removes: Iron, Manganese, Sulfur, Arsenic, Radium, Heavy Metals and Radio Nuclides. It also will filter suspended solids, sediment, turbidity, organics, colors and odor.

03

Hi-Activity Catalytic Carbon

The highest grade of carbon available for drinking water filtration, its microporous structure provides a much longer service life than lower grades of carbon found in a majority of competing systems. The catalytic carbon used in the Platinum Series removes chlorine, chloramines, THM's, heavy metals, bromate, PFA's, volatile organic compounds, pharmaceuticals, biological and hundreds of various chemical contaminants.

04

Zeolite Mineral Stone

Significantly reduces sediment and turbidity to drastically increase filtration efficiency and capacity up to 300%. Clinoptilolite also helps conserve the amount of water needed for backwashing and regeneration making the Platinum System one of the most eco-friendly water treatment systems on the market.

05

Garnet Mineral Stone

Water passes through a media bed of quartz mineral stone removing suspended solids, and sedimentation. Allowing for maximum water distribution and efficiency.

06

Quad-Polarity Anti-Scale Ionizer

- Significantly reduces hard water scale formation by ionizing the minerals Calcium and Magnesium.
- Greatly extends the life of appliances and expensive plumbing fixtures
- Creates better lathering of soaps and detergents
- Reduced water spotting on dishes, countertops, faucets and showers
- ECO friendly solution

FEATURES AND BENEFITS

Designed for the whole home.

- 30 Day Money Back Guarantee
- Industry-leading 20-year All-Inclusive warranty
- Maintenance free
- No salt, no potassium, and no filters to change
- Quad-Polarity Ionization Chamber breaks down scale forming minerals, inhibiting scale formation in pipes, appliances, and water heaters
- 6 full stages of water treatment to ensure consistently high quality, delicious, odor-free, alkaline drinking water to every faucet in your entire home
- Bacteriostatic Filtration removes heavy metals and chlorine. It also prevents scale build-up and algae formation.
- Hi-activity catalytic carbon lasts up to 5 times longer than ordinary carbon and removes more contaminants.
- Patented Vortech™ water distribution system increases filtration capacity, reduces regeneration and backwash pressure therefore greatly conserving water usage by up to 30%.
- Innovative and patented self-cleaning design accelerates the velocity of water across the distributor, preventing the potential build-up of contaminants resulting in up to 80% better efficiency.
- Hi-grade stainless steel jacketed tank
- Wastes less water than competing brands
- Single Tank System
- Made in the U.S.A.

SAVINGS PER YEAR COMPARED TO A WATER SOFTENER

$150+	Salt / Potassium
$300	Wasted regeneration water from water softeners
$200	Refrigerator or reverse osmosis filters
$125	Water Heater Replacements
$400+	Bottled water

$1,175±
ESTIMATED TOTAL ANNUAL SAVINGS!

Vortech™ Plate Technology

The world's most innovative and efficient universal distribution system for water treatment systems, in filtration and softening applications. The design creates fluidity of the media bed and extends contaminant removal capacity up to 80% which means less regenerations and significant reduction of water use.

AFFILIATIONS & COMPONENT STANDARDS

IAPMO • Gold Greenness Business Certified • Member, Water Quality Association
Components comply with NSF/ANSI Standards 42 and 61 • Made in USA • BBB Accredited Business
