

WHOLE HOUSE ALKALINE WATER

for your family, your home, and your pets

Specifications

WK-ECO-MUN-1252	WK-ECO-MUN-948
4-stage filtration	4-stage filtration
Treats up to 5 bathrooms	Treats up to 3 bathrooms
≈2,000,000 gallon capacity	≈1,000,000 gallon capacity
Service flow up to 20 GPM	Service flow up to 15 GPM
Digital automatic backwash	Digital automatic backwash
Tank size: 12" x 52"	Tank size: 9" x 48"

ECO Series *Salt-free*

ECO Series

4-Stage Municipal Water Filtration & Conditioning System

The King ECO Municipal Series provides a feature packed, affordable solution that requires NO Maintenance. This system delivers spring-quality alkaline* drinking water to every faucet in your home. It is a comprehensive solution for your entire household that will remove contaminants such as chlorine, THMs, heavy metals, volatile organic compounds, herbicides, pesticides, and many pharmaceutical residuals. Our magnetic dual-polarity, anti-scale ionizer prevents hard water scale build-up without the use of synthetic materials such as polyphosphates, commonly found in many other salt-free multi-tank systems. The anti-scale ionizer reduces hard water scale formation inside your pipes, on plumbing fixtures, and even extends the life of your appliances. Ionization is a helpful step to healthy pH balanced drinking water.

The name "ECO" says it all – an affordable, premium grade water treatment system that delivers pure, healthy water throughout your entire home in an ecologically-friendly manner.

Buy a name you can trust, King Water Filtration.

Features and Benefits

- 30-day money-back guarantee.
- 10-Year All-Inclusive Warranty. No maintenance required for the entire warranty period.
- No salt, no potassium and no filters to change.
- Enjoy softer hair and skin.
- The dual-polarity magnetic ionizer dissolves existing scale and helps protect your plumbing system from future scale build-up, maximizing water pressure throughout your home and preventing damaging hard water scale forming on your appliances and plumbing system.
- Bacteriostatic filtration with NSF-approved KDF 55 removes heavy metals, chlorine, chloramines, volatile organic chemicals, and micro-organisms, while preventing scale and algae formation.
- Hi-grade coconut shell carbon is highly effective at filtering out volatile organic chemicals, pesticides, herbicides, chlorine, and many other volatile organic chemicals. It improves flavor and removes unpleasant odors from your drinking water.
- Eco-Friendly by conserving water and electricity.
- Recommended for all water heaters, even tankless.
- Bypass valve included.
- Healthy, delicious, odor-free alkaline water for your entire home from a single tank system.
- Protects your family from harmful contaminants that are absorbed into the skin while showering and bathing.
- Made in the U.S.A.

* Ph may vary slightly depending on your geographical location

SAVINGS PER YEAR COMPARED TO OTHER SYSTEMS	
\$150	Salt / Potassium
\$300	Wasted regeneration water from water softeners
\$200	Refrigerator or reverse osmosis filters
\$125	Water heater replacements due to rust from water softener brine water
\$400+	Bottled water
\$1,175+ ESTIMATED TOTAL ANNUAL SAVINGS!	

Stages of Filtration:

Stage 1: KDF55

Removes chlorine, chloramines, THMs, and heavy metal. KDF also controls scale and algae formation by preventing formation of waterborne bacteria and micro-organisms.

Stage 2: Coconut Shell Carbon

Our NSF-certified carbon is a highly adsorbent material used to remove contamination from water. Activated carbon has been known as a miracle filter media by many researchers because of its unique ability to remove offensive tastes, odors, color, chlorine and 100s of different volatile organic chemicals. Briefly, activated carbon acts like a sponge, with a large surface area to absorb contaminants in the water. Activated carbon is approved by the EPA to remove a host of potentially hazardous and possibly carcinogenic chemicals in drinking water, such as PFAs "Forever Chemicals", pesticides, herbicides and more.

Stage 3: Quartz Mineral Stone

Water passes through a media bed of quartz mineral stone removing suspended solids, and sedimentation. Allowing for maximum water distribution and efficiency.

Stage 4: Quad-Polarity Scale-Reducing Ionizer

- Significantly reduces hard water scale formation.
- Greatly extends the life of appliances and expensive plumbing fixtures.
- Creates better lathering of soaps and detergents.
- Reduces water spotting on dishes, countertops, faucets and showers.
- ECO friendly solution.
