## The Pinnacle Solution in Salt-Free Water Treatment

FW-PLA-MUN-1354	FW-PLA-MUN-1054
6-stage filtration	6-stage filtration
Treats up to 6 bathrooms	Treats up to 4 bathrooms
≈2,750,000 gallon capacity	≈1,750,000 gallon capacity
Service flow up to 28 GPM	Service flow up to 23 GPM
Automatic backwash	Automatic backwash
Tank size: 13″ x 54″	Tank size: 10″ x 54″

\*Commercial and estate sized systems available

### **Features and Benefits**

- 30 Day Money Back Guarantee
- Industry-leading 20-year All-Inclusive warranty
- Maintenance free
- No salt, no potassium, and no filters to change
- Quad-Polarity Ionization Chamber breaks down scale forming minerals, inhibiting scale formation in pipes, appliances, and water heaters
- 6 full stages of water treatment to ensure consistently high quality, delicious, odorfree, alkaline drinking water to every faucet in your entire home
- Bacteriostatic Filtration removes heavy metals and chlorine. It also prevents scale build-up and algae formation.
- Hi-activity catalytic carbon lasts up to 5 times longer than ordinary carbon and removes more contaminants.
- Patented Vortech<sup>™</sup> water distribution system increases filtration capacity, reduces regen-eration and backwash pressure therefore greatly conserving water usage by up to 30%.
- Innovative and patented self-cleaning design accelerates the velocity of water across the distributor, preventing the potential build-up of contaminants resulting in up to 80% better efficiency.
- Hi-grade stainless steel jacketed tank
- Wastes less water than competing brands
- **Single Tank System**
- Made in the U.S.A.

# Stages of Filtration:

### Stage 1: KDF 55

Designed specifically for removing or reducing chlorine and water-soluble heavy metals. It also controls scale, bacteria and algae, even in hot water. KDF 55 has received NSF International Certification and is certified by NSF to NSF/ANSI Standard 42 drinking water applications.

#### **Stage 2: Katalox**

Removes: Iron, Manganese, Sulfur, Arsenic, Radium, Heavy Metals and Radio Nuclides. It also will filter suspended solids, sediment, turbidity, organics, colors and odor.

#### Stage 3: Hi-Activity Catalytic Carbon

The highest grade of carbon available for drinking water filtration, its microporous structure provides a much longer service life than lower grades of carbon found in a majority of competing systems. The catalytic carbon used in the Platinum Series removes chlorine, chloramines, THM's, heavy metals, bromate, PFA's, volatile organic compounds, pharmaceuticals, biological and hundreds of various chemical contaminants.

### **Stage 4: Zeolite Mineral Stone**

Significantly reduces sediment and turbidity to drastically increase filtration efficiency and capacity up to 300%. Clinoptilolite also helps conserve the amount of water needed for backwashing and regeneration making the Platinum System one of the most eco-friendly water treatment systems on the market.

#### **Stage 5: Garnet Mineral Stone**

efficiency.

#### Stage 6: Quad-Polarity Anti-Scale Ionizer

- Significantly reduces hard water scale formation by ionizing the minerals Calcium and Magnesium.
- Greatly extends the life of appliances and expensive plumbing fixtures
- faucets and showers
- ECO friendly solution

The world's most innovative and efficient universal distribution system for water treatment systems, in filtration and softening applications. The design creates fluidity of the media bed and extends contaminant removal capacity up to 80% which means less regenerations and significant reduction of water use.

Water passes through a media bed of quartz mineral stone removing suspended solids, and sedimentation. Allowing for maximum water distribution and

- Creates better lathering of soaps and detergents
- Reduced water spotting on dishes, countertops,
