

WATER THAT'S GOOD for your family, your home, and your pets

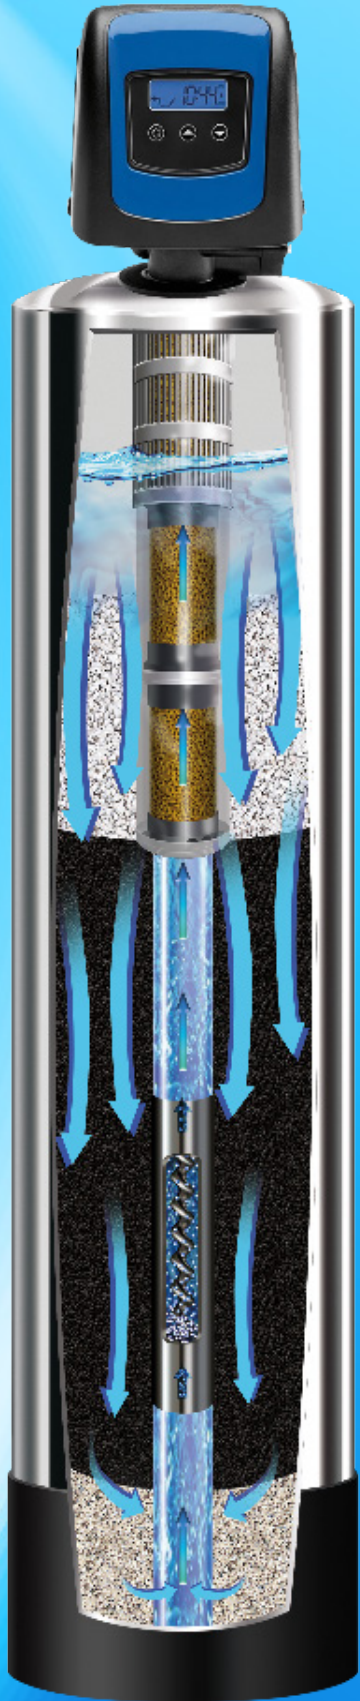

Specifications	
FW-SIG-MUN-1252	FW-SIG-MUN-948
5-stage filtration	5-stage filtration
Treats up to 6 bathrooms	Treats up to 4 bathrooms
≈2,500,000 gallon capacity	≈1,500,000 gallon capacity
Service flow up to 25 GPM	Service flow up to 20 GPM
1.25" NPT Fittings	1.00" NPT Fittings
Tank size: 12" x 52"	Tank size: 9" x 48"

Signature Series

5-Stage Water Filtration & Conditioning System

The Freedom Signature Series Water Treatment Systems are the most economical way you can find to provide a comprehensive whole house water treatment solution designed to provide refreshing, healthy, and safe water to every faucet in your home, and protect your home and your expensive appliances from the damaging effects of hard water scale and corrosion.

The Signature Series is specifically engineered to treat contaminated city water by removing chlorine, chloramines, THM's, VOCs, pesticides, herbicides, organic chemicals, heavy metals, bad tastes and odors.

The salt-free hard water conditioner found in the Signature Series System is a patented technology using a "Catalytic Converter" to transform the scale forming calcium and magnesium (Bi-Carbonate), to non-scale forming minerals called "Aragonite" (Carbonate). Using water turbulence to expose the calcium and magnesium to a small electrical charge, hardness in the water is converted to microscopic aragonite crystals that will pass harmlessly through your plumbing without leaving behind any scale. As a matter of fact, it will even assist to dissolve existing scale build up within your plumbing system.

Conventional water softeners remove the healthy and essential Calcium and Magnesium minerals from the water, merely by replacing them with salts. One of the major benefits of our Catalytic Scale Prevention Technology is that it does not remove these essential healthy minerals, however prevents corrosion of your plumbing, and helps provide a healthy alkaline balanced water for drinking and bathing.

Aragonite is better for your plumbing system by preventing scale, it is also healthy for your body assisting to fuel your organs, provide proper muscle function, strengthen bones, assist in healthy digestion, boost mental and physical performance and even reduce excessive amounts of damaging stomach acid. The Signature Series Catalytic Converter protects your appliances and plumbing system from the damaging effects of hard water scale without the use salt or potassium, but most importantly, it provides healthy high quality drinking water for your entire family throughout your entire home.

The Signature Series Salt-Free water treatment system delivers refreshing, great tasting drinking water and protects your hair and skin from the damaging and drying effects of the contaminants commonly found in municipally treated water.

SAVINGS PER YEAR COMPARED TO OTHER SYSTEMS	
\$150+	Salt / Potassium
\$300	Wasted regeneration water from water softeners
\$200	Refrigerator or reverse osmosis filters
\$125	Water heater replacements due to rust from water softener brine water
\$400+	Bottled water
\$1,175 ±	ESTIMATED TOTAL ANNUAL SAVINGS!

Features and Benefits

- 30 Day Money Back Guarantee
- Industry leading 15 year All Inclusive warranty
- Maintenance Free
- No salt, no potassium and no filters to change
- Feature packed and Eco Friendly (both Environmentally and Financially)
- Catalytic Technology naturally converts the scale forming minerals (calcium and magnesium) to an "Aragonite", a healthy water-soluble mineral that will not form hard water scale build up in your plumbing, water heater and fixtures. It also provides for refreshingly healthy alkaline drinking water.
- 5 full stages of water treatment to ensure consistent high quality drinking water
- Bacteriostatic Filtration utilizing KDF55 to remove heavy metals, chlorine, chloramines, volatile organic chemicals, microorganisms, prevent scale and algae formation
- Hi-activity catalytic carbon lasts up to 5 times longer than ordinary carbon and removes toxic heavy metals such as arsenic, mercury and lead, as well as chlorine, chloramines, volatile organic compounds, herbicides, pesticides, pharmaceutical residuals, PFA's also referred to as "Forever Chemicals", and much more.
- Hi-grade stainless steel jacketed tank
- Stainless steel bypass valve and hardware kit
- Healthy, delicious, odor-free, alkaline water for your entire home all from a single tank
- Protects your family from potential health affecting contaminants that are absorbed into the skin while showering and bathing
- Environmentally safe alternative to salt based water softeners

* Ph may vary slightly depending on your geographical location

* King Water Filtration Signature Systems are intended for treatment of potable water provided by municipal water providers. While the Signature Series system may be effective for treatment of Well Water it is vital that a well water quality analysis be provided for review in order to ensure that optimum results will be delivered.

Stages of Filtration:

Stage 1: KDF 55 (Dual Chamber)

Removes chlorine, microorganisms, and heavy metals. This helps raise pH and inhibit bacterial growth. KDF also controls hard water scale and algae formation by killing waterborne bacteria, parasites, cysts, and viruses.

Stage 2: Clinoptilolite Mineral Stone

This natural mineral stone significantly reduces sediment and turbidity drastically increasing filtration efficiency and capacity up to 300%. Clinoptilolite also helps to conserve the amount of water needed for backwashing and regeneration.

Stage 3: Hi-Activity Catalytic Carbon

The highest grade of carbon available for drinking water filtration, its microporous structure provides a much longer service life than lower grades of carbon found in competitor systems. The catalytic carbon used in the Platinum Series removes chlorine, chloramines, heavy metals, bromate, PFA's, volatile organic compounds, pharmaceuticals, biological and hundreds of chemical contaminants.

Stage 4: Quartz Mineral Stone

Water passes through a media bed of quartz mineral stone removing suspended solids and sedimentation for maximum water distribution and efficiency.

Stage 6: Quad-Polarity Magnetic Anti-Scale Ionizer

- Significantly reduces hard water scale formation by ionizing the minerals Calcium and Magnesium.
- Greatly extends the life of appliances and expensive plumbing fixtures
- Creates better lathering of soaps and detergents
- Reduced water spotting on dishes, countertops, faucets and showers
- ECO friendly solution
